About this font

Year of release: 2025

Version: 1.001

Font Styles: 9 + variable

Design: Enen Studio & Arthur Schwarz

Team: Maël Bächtold

BS Staahl is a modular display typeface developed in collaboration with graphic design studio Enen. Originally designed for the signage system of a school in western Switzerland, it was conceived as a single architectural typeface to be used consistently across the entire site.

Its design follows a semi-modular logic, with every outer corner sharing the same radius, echoing elements from the school's architecture. In contrast, inner junctions are sharply defined, giving each letter a precise, constructed feel. This detail is visible, for example, in the **e**, where rounded contours meet sharp angled intersections.

BS Staahl features an optical size axis, available as a variable font, with contrast evolving from minimal to pronounced. The family includes three predefined styles, Elementary, Middle and High, each representing a distinct contrast level. Stems remain assertive, while diagonals and horizontals are more restrained, especially in the High style. In addition to these core styles, the typeface is also available in Italic and Backslanted.

The rhythm is compact and robust. Certain glyphs, such as **M**, **N**, **W** and **w**, break the underlying structure with more opportunistic contrast, adding nuance to the otherwise brutalist typography system. With tight spacing and a high x-height, BS Staahl performs best at large sizes, where its uncase flavor and visual tension can fully emerge.
